### The "elf-sized" chairs

Christmas was coming! Santa wanted to give himself a present. The present was a chair so Santa wanted the elves to help him to make a chair.

The elves said, 'Yes!' But the elves were very small. Then the elves went to the workshop and planned how to make the chairs. The elves were very hard-working. They spent four hours to make the chairs. They wanted Santa to see the chairs at once.

Santa was surprised when he saw the chairs because there were a lot of "elf-sized" chairs.

Santa said to the elves, 'Thank you very much! Goodbye!' So the elves were proud of themselves. But the chairs were too small so Santa used a sack to pack them up. Finally, Santa could not sit on the sack of the chairs and he was in trouble.
