

How to add a new classroom to a school

Written by Chen Sui Lam (5A)

First, put a fence in the playground to stop the children from going in. Then, the digger digs a big hole in the playground. After that, lay some blocks. Next, lift the classroom with a crane. Later, put the classroom on the blocks. Finally, put the roof on the classroom.

After you've built the classroom, put the table tennis table in there, because the children like playing table tennis. Put the computers for children to use. Now your new classroom is ready!
